

Name *	Hilde van Santen
Email *	hildevansanten@gmail.com
Area of Expertise*	AAC assessment, application and implementation for children in special school with a variety of diagnoses such as Cerebral Palsy, ASD, Down Syndrome and chromosomal mutations. Supervision, Dysphagia.
Level of CAT accreditation *	CAT level 1 and 2 (2011)
Supervision Models* - in 150 words or less explain what type of supervision models you use	The model that I use is Reflective Practice in Supervision. The purpose of the reflective supervision model is to support the agenda, task and process in the supervisory relationship towards critical reflection of practice. My philosophy is that supervision should <ul style="list-style-type: none"> <li>- enable colleagues to develop their own AAC practice and become independent and empowered in their work</li> <li>- enable colleagues to make good decisions based on research and holistic thinking</li> <li>- recognise areas of need for professional development and ways of accessing this.</li> </ul>
